**4. FIRST AID MEASURES**

---

**EYE CONTACT:**

Flush immediately with large amounts of running water for at  
least 15 minutes while lifting eyelids. Take to a physician  
for medical treatment.

**SKIN CONTACT:**

Remove product and immediately flush affected area with  
water for at least 15 minutes. Remove contaminated clothing  
and shoes. Launder before reuse. Except in the most minor,  
superficial and localized burns, cover affected area with  
sterile dressing or clean sheeting and transport for medical  
care. DO NOT APPLY GREASES OR OINTMENTS. Control shock, if  
present. Call a physician. Victims with a major skin area  
contact should remain under medical observation for at least  
24 hours due to possible delayed effects.

If swallowed, CALL A PHYSICIAN OR POISON CONTROL CENTER  
IMMEDIATELY.

Do not induce vomiting.

**INHALATION:**

Move patient to fresh air. If breathing has stopped or is labored, give assisted respiration (eg. mouth-to-mouth). Supplemental oxygen may be indicated. Prevent aspiration of vomit. Turn victim's head to the side. Assure mucous does not obstruct airway. Call a physician.

**FIREFIGHTING PROCEDURES AND EQUIPMENT:**

Keep containers tightly closed. Isolate from heat, electrical equipment, sparks and open flames. Closed container may explode when exposed to extreme heat. Do not apply to hot surfaces. Never use welding or cutting torch on or near product container (even empty) because product (even residue) can ignite explosively. Full protective equipment including self-contained breathing apparatus should be worn. Water spray may be ineffective. Water may be used to cool closed containers to prevent pressure build-up or possible autoignition or explosion when exposed to extreme heat. If water is used, fog nozzles are preferable. During a fire, irritating and highly toxic gases (See Section 10, Incompatibilities data) and smoke are present from the decomposition/combustion products.

**STEPS TO BE TAKEN IN CASE MATERIAL IS SPILLED :**

Evacuate all non-essential personnel and remove all sources of ignition (flames, hot surfaces, electrical, static and frictional sparks). Ventilate area. Equip clean-up crew with appropriate protective equipment. Avoid breathing vapors. Avoid skin contact. Prevent entry into drains, sewers and waterways. Notify appropriate authorities if necessary. Contain and remove with inert absorbent and nonsparking tools.

**7. HANDLING AND STORAGE**

---

**HANDLING:**

Use only with adequate ventilation. Avoid prolonged breathing of vapors. Wear an appropriate, properly fitted respirator (NIOSH/MSHA approved) during and after application unless air monitoring demonstrates that vapor/mist levels are below applicable exposure limits. Follow respirator manufacturer's directions for use. Use grounding and bonding connection when transferring material to prevent static discharge, fire or explosion. Avoid free fall of liquid in excess of a few inches. Use sparkproof tools and explosion proof equipment.

**STORAGE:**

Do not store above 120 F or below 32 F. Store large quantities in buildings designed to comply with OSHA's 29 CFR 1910.106. Keep away from heat, sparks and open flame. Keep containers closed when not in use. Keep closures tight and upright to prevent leakage. Emptied containers may retain hazardous residue. Follow all hazard precautions in this data sheet until container is thoroughly cleaned or destroyed. To avoid spontaneous combustion during temporary storage, soak soiled rags and waste immediately after use in a water-filled, closed container.

**8. EXPOSURE CONTROLS/PERSONAL PROTECTION**

---

**ENGINEERING CONTROLS:**

Provide general dilution or local exhaust ventilation in volume and pattern to keep the air contaminant concentration below current applicable OSHA safety and health requirements in the mixing, application and curing areas; and to remove decomposition products during welding and flame cutting on surfaces coated with this product.

**RESPIRATORY PROTECTION:**

When spray applied and when used in limited ventilation areas, wear a NIOSH/MSHA approved organic vapor/particulate respirator designed to remove a combination of particulate, gas and vapor. When used in confined areas or poorly ventilated areas, use a NIOSH/MSHA approved air line type respirator or hood. During sanding or grinding operations, use a NIOSH approved particulate respirator to remove solid airborne particles of sanding dust. Use NIOSH approved respirators when flame cutting, welding or hazing material coated with this product. Observe OSHA regulations for respirator use (29 CFR 1910.134). Air monitoring of the workplace may be required to determine appropriate respirator selection.

**EYE PROTECTION:**

Use safety eyewear with splash guards or side shields. A full face shield may be appropriate. Contact lenses should not be worn.

**SKIN PROTECTION:**

It is good industrial hygiene practice to minimize skin contact. Chemical resistant gloves are required for prolonged or repeated contact. An apron may be appropriate to protect against skin contact. Prevent prolonged skin contact with contaminated clothing. Wash contaminated clothing before reuse.

**OTHER PROTECTIVE EQUIPMENT AND GUIDLINES:**

Safety showers and eye wash stations should be available. Educate and train employees in the safe use of this product.
